

Questions for Psoola

To send to Psoola before we connect the website. Questions marked **Must** block the build; everything else is needed before launch. Write their answers in the right-hand column.

Who we are: iSmile 2026, International Dental Summit · 20–21 November 2026 · Grand Millennium Sulaimani. We want to take registration payments online through Psoola using **Visa, MasterCard, FIB and FastPay**, connected to our website through your API and webhook. We would like test access by **6 October 2026**.

About us (fill in before sending)

Organiser (legal name)	
Contact person, phone, email	
Technical contact (developer)	
Website	ismile.krd (to be confirmed)
Currency	Iraqi dinar (IQD)
Expected payments	about _____ payments, mostly late October to 20 November 2026
Typical amount per payment	about _____ IQD (ticket + optional lunch)

1. Account and contract

#	Question	Their answer
1.1	What documents do you need from us to open the merchant account, and how long does approval take? Must Usually the slowest step. We want to start it immediately.	
1.2	Will Visa, MasterCard, FIB and FastPay all be active on our account? From what date? Must The website shows exactly these four.	
1.3	What are your fees for each method (percentage and/or fixed amount)? Any monthly or setup fee? Fees go into the ticket price.	
1.4	Minimum and maximum amount per payment? Daily or monthly limits on our account?	
1.5	Is the currency IQD only, or also USD?	

1.6	Who is our contact for technical problems, and how fast do you answer — especially on 20–21 November?	
-----	---	--

2. Test access and documentation

#	Question	Their answer
2.1	Please send the API documentation . Must	
2.2	Please send test (sandbox) credentials . Must So we can test hundreds of payments without real money.	
2.3	Test cards (successful, declined, 3-D Secure) and test FIB / FastPay accounts — what are they?	
2.4	Is there a merchant dashboard where we can see every payment, in test and live?	
2.5	Is there an example integration or a library (PHP preferred)?	

3. How a payment works

#	Question	Their answer
3.1	To create a payment, what do we send (amount, currency, our reference, customer email/phone, return addresses)? What do you return (payment ID, payment page address)? Must	
3.2	For Visa / MasterCard: does the customer type the card on your hosted page ? We do not want card details on our website. Must	
3.3	For FIB and FastPay: how does it work on a phone — does the app open automatically, is there a QR code on a computer, and how does the customer come back to our site?	
3.4	Can we choose the method in advance (the customer already picked Visa on our site), or does the customer choose again on your page?	
3.5	How long is a payment link valid? What happens if the customer pays after it expires?	
3.6	Can we start a new payment for the same reference if the first one failed?	
3.7	Is 3-D Secure (one-time code from the bank) used for cards?	

3.8	Is your payment page available in Arabic and Kurdish ? Can we choose the language?	
-----	--	--

4. Webhook and security

#	Question	Their answer
4.1	How is the webhook secured : signature (which algorithm), shared secret, or your IP addresses? Must Otherwise someone could fake a "payment succeeded" message.	
4.2	Which events do you send (paid, failed, cancelled, expired, refunded)? Please send an example message for each. Must	
4.3	If our server does not answer, do you retry ? How many times and for how long?	
4.4	Is there an API call to check a payment's status by its ID? Must We confirm every payment with you before issuing a ticket.	
4.5	Can the same event be sent twice? Is there an event ID we can use to ignore duplicates?	
4.6	Does the confirmed payment include the amount and currency actually paid?	
4.7	How do we keep keys safe: separate test and live keys? Can we rotate (change) them ourselves if needed?	
4.8	Is your service PCI DSS certified? Please share the certificate or confirmation.	

5. Refunds and money

#	Question	Their answer
5.1	Can we make a refund through the API or the dashboard? Full and partial? For all four methods? Tickets are non-refundable, but a duplicate payment must be refunded.	
5.2	How long does a refund take to reach the customer? Is the fee returned?	
5.3	When and how does the money arrive in our bank account (daily, weekly)? Which bank(s)?	

5.4	Can we download a report of payments and settlements (Excel/CSV)?	
5.5	What happens with chargebacks (a card holder disputes a payment)?	

6. Service and availability

#	Question	Their answer
6.1	Is there planned maintenance we should know about? Do you announce downtime?	
6.2	Any request limits on the API (requests per minute)?	
6.3	Do you need our webhook address and return addresses registered in advance, or do we send them with each payment?	
6.4	Can sponsors pay larger amounts (for example several million IQD) through the same account?	
6.5	Do we need to show your logo or any wording on our payment page? Do you provide official Visa / MasterCard / FIB / FastPay logos?	

Do not send to Psoola: any password, or access to our website, admin or server. They never need it. Later we give them only our webhook address. **When they reply:** send the documentation to the developer; send the test keys privately (never in a group chat or email thread with many people).
